

PRESS RELEASE

NOVAIR acquires US based manufacturer OGSi - Oxygen Generating Systems Intl.

January 3rd, 2022

NOVAIR, worldwide leader manufacturer of on-site gas production systems, is proud to announce the acquisition of OGSi - Oxygen Generating Systems Intl., effective January 1st, 2022.

OGSi is a US based manufacturer of medical and industrial oxygen generators, with manufacturing facility located in Buffalo, NY State.

OGSi has a range of highly durable oxygen generators, specifically designed for demanding applications such as disaster preparedness, healthcare or semiconductors manufacturing. Designed in accordance with US standards, OGSi solutions are distributed all over USA as well as internationally.

As part of NOVAIR Group, OGSi is gaining access to a wide range of high-end solutions that will greatly complement its existing ranges, including medical and industrial PSA oxygen & nitrogen generators, high pressure oxygen cylinder filling systems, and medical air/vacuum plants. More synergies are also to expect through NOVAIR services and engineering competencies.

Already counting installations in over 115 countries, NOVAIR strengthens even further its global presence and manufacturing capacity, with a foothold in such an important country as USA. With this acquisition, NOVAIR is taking a major step forward to definitely form the worldwide leading group in on-site gas production systems.

We are thrilled to welcome OGSi teams in the Group and cannot wait to start collaborating with them. What a great way for all of us to start 2022 !

We take this opportunity to thank all our partners who have been working hard until the very end of 2021 to make this possible.

About NOVAIR

NOVAIR is the worldwide leading manufacturer of on-site gas production systems for Healthcare and Industrial applications. With 45 years of presence on market and R&D centers in France and Italy, NOVAIR leads innovation in on-site gas production by adsorption.

Headquartered in France, NOVAIR is operating in over 115 countries and counts thousands gas generators running worldwide, supplying daily medical oxygen to hundreds of thousands of patients, as well industrial oxygen and nitrogen to numerous Industries in many different application segments.
